

Leveraged ETFs for Sharp Traders

Tradr ETFs are designed for sophisticated investors and professional traders who are looking to express high conviction investment views.

Our innovative leveraged and inverse ETFs seek short or long exposure to actively traded stocks and ETFs. Tradr was the first to bring to market leveraged ETFs based on single stocks as well as Calendar Reset Leveraged ETFs for investors seeking to amplify performance over weekly, monthly and quarterly periods.

As of 10/1/2024

	TSLQ	Tradr 2X Short TSLA Daily ETF	-2X	Short	Daily	7/13/2024	Yes

Tradr ETFs are for sophisticated investors and professional traders with high conviction views and are very different from most other ETFs. The Funds pursue leveraged investment objectives, which means they are riskier than alternatives that do not use leverage because the Funds magnify the performance of their underlying security. The volatility of the underlying security may affect a Fund's return as much as, or more than, the return of the underlying security. Investors in the fund should: (a) understand the risks associated with the use of leverage; (b) understand the consequences of seeking inverse and leveraged investment results; (c) for short ETFs, understand the risk of shorting; (d) intend to actively monitor and manage their investment. Fund performance will likely be significantly different than the benchmark over periods longer than the specified reset period and the performance may trend in the opposite direction than its benchmark over periods other than that period.

ETFs involve risk including possible loss of the full principal value, regardless of whether an investor holds the ETF for a single calendar reset period or over the course of multiple calendar reset periods. There is no assurance that the Fund will achieve its investment objective. Principal risks and other important risks may be found in the prospectus. Past performance does not guarantee future results.

Investors should carefully consider the investment objectives, risks, charges and expenses of the Funds. This and other important information about the Fund is contained in the Prospectus, which can be obtained by visiting www.tradretfs.com. The Prospectus should be read carefully before investing.
